CONCRETE SIDEWALK LIGHTS
Cast Iron Construction

Details showing Concrete Sidewalk Lights with cast iron framework and tiles as furnished f. o. b. cars.
Concreting is done in shop before shipment, so that installation at building is a simple matter.
Can be made with panels 5'0" x 5'0", or of similar area. We can furnish panels without cast iron frame, using T iron cross ribs if desired.
Send sketches or drawing of work if possible.
Prices given f. o. b. cars or set in place at building.
Details of construction of reinforced concrete sidewalk lights. This system consists of glazed panels of concrete with \( \frac{1}{4} \)" twisted steel rods between the rows of glass with cross supports of concrete or of T iron.

Panels are glazed with plain, multi prism or refracting lens glass, or with combinations of the different lenses. Panels are made any shape or size up to twenty-five square feet. Sections of from twelve to twenty square feet are most convenient to handle, as the weight is 25 pounds per square foot.

Concreting is done in shop by experts in this class of work, insuring best results. The panels may be set at building by any mechanic.

Prices f. o. b. cars or set in place at building.
LENSES FOR REINFORCED CONCRETE LIGHTS

Plain Lense No. 27

Multi Prism No. 28
FLOOR LIGHTS
Floor Lights are constructed of heavy cast iron panels with T iron cross supports, and are designed to carry regular floor loads with a proper factor of safety.

The standard floor glass is 6" square, and we also have patterns for 4" square glass. These two sizes of glass are of sufficient thickness to permit of light trucking. We are also prepared to quote on any special size or kind of glass required.

Glass is set with an elastic cement. The joints between the panels are also filled with this cement, which provides for expansion and contraction.

Skylights of a similar construction to the above glazed with wire glass are also manufactured by us. We prepare for proper joining with flashing, ventilators, etc.

Prices quoted f. o. b. cars, with panels glazed in shop, or set in place at building.
SKY LIGHTS

PATTERN No. 1

PATTERN No. 2

PATTERN No. 3

PATTERN No. 4

Can be made any desired shape. Send drawings for estimate. Price according to construction.
