By Way of Suggestion

Solar Prisms have been known to the trade, and to thousands of the public generally, for a number of years. Their reputation for being the best in quality, appearance and effectiveness is the result of years of patient study and painstaking care on the part of the manufacturers.

The designs shown in this booklet are merely intended as suggestions of various designs and artistic effects readily obtainable of us.

When desired, special forms and designs will be made to order, either from an architect's plans or our own.

The glazing of Solar Prisms in ornamental designs is a new departure with us, and the latest development in prismatic lighting.

For beauty and utility they have no equal.

We are always glad to submit estimates for their installation.

If the within suggestions interest you, write us and we'll take the matter up in detail.

If you want any information on prismatic lighting we have a special booklet on the subject, which we will send on request; free, of course.
